

Course Contents

Introduction

- overview of SAS Foundation
- course logistics
- course data files
- purpose of the macro facility
- program flow

Macro Variables

- introduction to macro variables
- automatic macro variables
- macro variable references
- user-defined macro variables
- delimiting macro variable references
- macro functions

Macro Definitions

- defining and calling a macro
- macro parameters

DATA Step and SQL Interfaces

- creating macro variables in the DATA step
- indirect references to macro variables
- creating macro variables in SQL

Macro Programs

- conditional processing
- parameter validation
- iterative processing
- global and local symbol tables

Learning More

- SAS resources
- beyond this course

Supplemental Materials

- program flow
