Get Real Health®

# See your patients like never before

Get Real Health

Get Real Health® combines a world of new information from patients, devices and apps with existing clinical data to help individuals and healthcare professionals engage and empower each other. By giving providers and patients the information and tools they need to work together, we help our customers meet their ever-changing patient engagement needs. We help them deliver value-based care, improve outcomes, activate patients, and increase patient loyalty and satisfaction.

The Get Real Health Solution

Our products are flexible enough to work together or separately so organizations of all sizes can design a solution that meets their needs today and grows with them in the future.

InstantPHR®
a Product of Get Real Health

Dynamic tools for more empowered patients

InstantPHR® empowers patients and providers through an untethered design and cutting edge tools. Unlike static portals, this interactive user interface brings health data to life and promotes a collaborative approach to care.

InstantPHR Highlights

→ Vendor Neutral & Interoperable
Can operate on any data platform and integrate with any EMR, EHR, or clinical data repository.

→ Built for Maximum Flexibility
InstantPHR's modular technology allows for solutions to be completely configured to meet your organization's needs.

→ Personalized User Experience
User-friendly design and health trackers make data relevant to patients and providers in a portal that can be skinned to match your organization's branding.

→ Full Localization and Language Capabilities
InstantPHR supports multiple languages, right-to-left text and allows patients to set preferred units and language.

→ Integrated with Device Ecosystems
Patients can connect clinical and home health devices, wearables and apps making InstantPHR a true patient health management hub.

→ Comprehensive Care Management Tools
Powerful collaborative care tools like care plans and health journals allow healthcare professionals and patients to easily work together to manage chronic diseases and improve patients' overall health and wellness.

→ Unique Views for Each Area of the Organization
InstantPHR's platform is comprised of a provider dashboard that the care team can use to view patient information.

An intuitive content management system gives administrative users the ability to make real-time content and layout modifications to the portal.

The customer service portal allows for the management of patient accounts, resetting passwords and a reporting view for portal usage.

Empower your patients with a universal health record full of tools to better manage their health.

- ✔ Appointment scheduling
- ✔ Secure messaging
- ✔ Reminders
- ✔ Bill pay
- ✔ Video conferencing
- ✔ Symptom checker
- ✔ Dynamic surveys & assessments
- ✔ Available on all devices

CHBase™
a Product of Get Real Health

A development platform to connect the world of patient data

CHBase™ is a data aggregation and application development platform built to maximize the value of data. The platform combines clinical data and personal health data for a 360 degree view of patients' health.

CHBase Highlights

→ Unified data platform for all patient engagement needs

→ Provides an ecosystem platform for application, system, and device integration

→ APIs for third-party applications and device ecosystems

→ Seamless EMR and HIE integration including ready-to-use integration with common health devices and clinical systems

→ Aggregates and optimizes data for analytics purposes like population health, marketing, and customer intelligence

→ Comprehensive and extensible storage and transformation of personal health data-types

→ Meets privacy and security requirements

→ Simple and flexible end-user registration including single sign-on to existing systems

→ Flexible hosting, either cloud or on-premises

Patient Benefits

Merge home health device data with clinical records in one consolidated platform with the ability to control with whom to share that data.

Developer Benefits

Quick start-up kits available for this comprehensive interface that pulls from existing patient data allowing developers to focus on their application, rather than database architecture.

Provider Benefits

A 360' view of patient's health leads to better tracking, chronic care management, shared decision making and long-term health outcomes.

Organization Benefits

Create deeper insights into population health, marketing and customer satisfaction initiatives with one platform aggregating all organization data.
